time	Monday 15 November 2021	Tuesday 16 November 2021	Wednesday 17 November 2021		
	All times are in CET (Italian) timezone	CIBB Scientific Programme (v8)			
		(10)			
09:00	CIBB 2021 Welcome	Second day welcome	Third day welcome	09:00	CIBB 2021 the 17th International Conference on
					Computational Intelligence Methods for Bioinformatics and Biostatistics
09:10				09:10	15-17 November, 2021 online
	"Predicting medical complications in intensive care: early recognition of	"Successful writing of bioinformatics grant proposals" Olaf	"DOME: recommendations for supervised machine learning		
	sepsis using machine learning" Karsten Borgwardt keynote	Wolkenhauer keynote	validation in biology" Dmytro Fishman keynote		
	main track: 1 "A collaborative training approach for stress detection", Eleonora Ciceri	neurodegenerative diseases session: 64 "Percolation-based Stability Analysis of Functional Connectivity in Mild Cognitive	DOME session, main track: 20 "Deep Recurrent Neural Networks for Generating Synthetic Coronavirus Spike		
09:50	***	Impairment and Alzheimer's Disease", Angela Lombardi	Protein Sequences", Lisa Crossman	09:50	http://www.isa.cnr.it/cibb2021/
10:10	14 "Topology-Aware Optimisation of Vaccination Strategy for Minimising Virus Spreading", Pietro Hiram Guzzi	12 "Peeking inside the box: transfer learning vs 3D convolutional neural networks applied in neurodegenerative diseases", Amira Soliman	61 "The need of standardised metadata to encode causal relationships: Towards safer data-driven machine learning biological solutions", Beatriz Garcia Santa Cruz	10:10	
10:30	53 "Integrating Decision Tree Learning on the Graph Database Neo4j to Analyze Clinical Data", Robert Heyer	54 "Impaired core networks and time-distant reconfiguration patterns in Alzheimer's disease", Kai Du	33 "Toward a standard formal semantic representation of the model card report", Muhammad Amith	10:30	Each number represents the article EasyChair #ID
10:50	57 "Camera-assisted Motor State Assessment of Patients with Parkinson's Disease", Vassilis Plagianakos	65 "Computer-aided diagnosis system for Alzheimer's disease using principal component analysis and machine learning-based approaches", Lilia Lazli	39 "Predictive modeling for Inflammatory Bowel Disease detection from endoscopic imaging", Marco Chierici	10:50	
	47 "Table detection in text documents for extracting regulatory interaction from	9 "Deep transfer learning for DTI- and MRI- based early diagnosis of cognitive	48 "An alternative learning algorithm for tree augmented naive Bayes: an application	11:10	kovnete & invited encekers
11:10	literature of regulation in bacteria", Axel Zagal-Norman 3 "Interpretability methods for differential gene analysis of scRNA-seqclustering	decline and dementia ", Nitsa Herzog 4 "Non-linear Clustering of Smell Clinic Data Reliably Differs Parkinson's Disease	to facial biotype classification", Gonzalo A. Ruz 67 "Deep Learning based Deblocking of Fourier Ptycographic images", Mattia Delli		keynote & invited speakers
11:30	models", Ciortan Madalina 5 "High-dimensional multi-trait GWAS by reverse prediction of genotypes using	Patients and Healthy People", Tatiana Anuchina 26 "Stratification of Parkinson's disease patients from the Fox Insight study", Anita	Priscoli 32 "Towards Generating Synthetic Pathways for Object Detection", Joshua	11:30	pause
11:50	machine learning methods*, Muhammad Ammar Malik 7 "Identifying SNP associations and predicting disease risk from Genome-wide	Valmarska 43 "Identifying prototype model patients in Amyotrophic Lateral Sclerosis patients at	Thompson 22 "Automatic Plankton Detection and Classification on Raw Hologram with a Single	11:50	chairs
12:10	association studies using LassoNet", Hussain Sajwani	diagnosis through Archetypal Analysis", Isotta Trescato	Deep Learning Architecture", Romane Scherrer	12:10	
12:30		51 "Inspecting Progression Trajectories in Amyotrophic Lateral Sclerosis using Process Mining", Erica Tavazzi	28 "Using Machine Learning to Predict Reading Strategies from fNIRS Data", Matthew Campbell	12:30	
	"Cellular and gene signatures of tumor-infiltrating dendritic cells and natural-killer cells predict prognosis of neuroblastoma" Ombretta Melaiu keynote	15 "End-to-end facial landmark detection to characterise oro-facial impairments in neurological patients: towards innovative techniques for the assessment of dysarthria", Lucia Migliorelli	8 "Convolution and Fast Fourier Transform to Compare Symbol Sequences", Michael Sadovsky		
13:10				13:10	main track
	pause	pause	pause		"Towards standardizing machine learning in life sciences: the FAIR principles and the DOME recommendations" session
	main track:	neurogenerative session & modeling session	ML session & main track:		"Artificial intelligence and statistical methods for neurodegenerative diseases" session
14:00	18 "Cancer-IncRNA: A Database of IncRNAs exploring chromosomal linkages in human cancers", Gaurav Kumar Bhagat	37 "Specialized prognostic models based on disease progression patterns: predicting non-invasive ventilation in ALS patients stratified by progression rate", Andreia Martins	21 "A Machine Learning-Based Efficient Sepsis Detection Using Electronic Health Records", Kal-Cheng Hsu	14:00	"Modeling and simulation methods for computational biology and systems medicine" session
14:20	19 "Summarizing Global SARS–CoV–2 Geographical Spread by Phylogenetic Multitype Branching Models", Hao Chi Kiang	25 "A statistical analysis of multiple sclerosis risk factor interaction with Bayesian networks", Morghan Hartmann	40 "Linear regression modelling to assess the impact of socio-economic, demographic and health-related variables on wellbeing in the elderly population", Isotta Trescato	14:20	"Machine learning in healthcare informatics and medical biology" session
14:40	23 "Batch Effect Detection in RNA-Seq Data using Machine-Learning-Based Automated Assessment of Quality", Maximilian Sprang	16 "Knowledge Graph-based Neurodegenerative Diseases and Diet Relationship	42 "A statistical network method to identify relevant genes for pathway enrichment		
		Discovery", Yi Nian	analysis", Giuseppe Agapito	14:40	
15:00	27 "Structural Classification of RNA Molecules using ASPRA Distance", Michela Quadrini	Discovery', Yi Nian 45 "In silico clinical trials for Relapsing-Remitting Multiple Sclerosis with MS TreatSim", Fianne Sips	analysis", Giuseppe Agapito 60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals", João Ribeiro Pinto	14:40	
	"Structural Classification of RNA Molecules using ASPRA Distance", Michela Quadrini "Improving bacterial sRNA identification by combining genomic context and	45 "In silico clinical trials for Relapsing-Remitting Multiple Sclerosis with MS TreatSim", Fianne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA	60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram	15:00	
15:20	Structural Classification of RNA Molecules using ASPRA Distance", Michela Quadrini Sa "Improving bacterial sRNA identification by combining genomic context and sequence-derived features", Moustafa Elsisy Harmore prediction of H3K27ac histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted.	45 "In silico clinical trials for Relapsing-Remitting Multiple Sclerosis with MS TreatSim", Flanne Sips	60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals", João Ribeiro Pinto	15:00 15:20	
15:20 15:40	27 "Structural Classification of RNA Molecules using ASPRA Distance", Michela Quadrini 38 "Improving bacterial sRNA identification by combining genomic context and sequence-derived features". Moustafa Elsisy 44 "Improved prediction of HSX72ra bistone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point. Nonammad Hallai	45 "In sillico clinical trials for Relapsing-Remitting Multiple Scierosis with MS TreatSim", Fianne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data", Andrea Tangherforil 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster Analysis", Bruno Glovanni Galuzzi	60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals", Jobo Ribeiro Pinto 62 "X-Ai-Covid-19 Diagnosis System based Multi-Datasets", Aicha Boutorh 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 2D brain age biomarkers.", Francesco Bardozzo	15:20 15:40	
15:20	Structural Classification of RNA Molecules using ASPRA Distance", Michela Quadrini Sa "Improving bacterial sRNA identification by combining genomic context and sequence-derived features", Moustafa Elsisy Harmore prediction of H3K27ac histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted.	45 "In sillico clinical trials for Relapsing-Remitting Multiple Sciencsis with MS TreatSim", Fianne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data", Andrea Tangherfoni 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster	60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals", Jobo Ribeiro Pinto 62 "X-Al-Covid-19 Diagnosis System based With-Datasets", Aicha Boutorh 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks	15:00 15:20	
15:20 15:40 16:00 16:20	27 "Structural Classification of RNA Molecules using ASPRA Distance", Michela Quadrini 38 "Improving bacterial sRNA identification by combining genomic context and sequence-derived features", Moustafa Elsisy 44 "Improved prediction of H3X72a histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point.", Mohammad Hallal 56 "Feature Relevance in IncRNA Microarray Data", Emanuel Di Nardo "A new concordant partial AUC and partial c statistic for imbalanced data in	45 "In silico clinical trials for Relapsing-Remitting Multiple Scierosis with MS TreatSim", Flanne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data", Andrea Tanghertoni 49 "Combining Denoising and Flux Balanca Analysis for Single-cell Cluster Analysis", Bruno Giovanni Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Steep", Matteo Italia "The prevalence threshold metric and its application to obstetrics and	60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals", João Ribeiro Pinto 62 "X-Al-Covid-19 Diagnosis System based Multi-Datasets", Aicha Boutorh 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 2D brain age biomarkers.", Francesco Bardozzo 58 "RNA Secondary Structure Factorization in Prime Tangles", Daniele Marchel "Interdisciplinary research and scientific journals: how to get the best out of	15:00 15:20 15:40 16:00	
15:20 15:40 16:00 16:20	27 "Structural Classification of RNA Molecules using ASPRA Distance", Michela Quadrini 38 "Improving bacterial aRNA identification by combining genomic context and sequence-derived features", Moustafa Elsisy 44 "Improved prediction of HAK27ac histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point, Mahammad Hallal 56 "Feature Relevance in incRNA Microarray Data", Emanuel Di Nardo "A new concordant partial AUC and partial c statistic for imbalanced data in the evaluation of machine learning algorithms" Andre Carrington keynote	45 "In silico clinical trials for Relapsing-Remitting Multiple Scierosis with MS TreatSim", Fianne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data", Andrea Tangherioni 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster Analysis", Bruno Giovanni Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Sleep", Matteo Italia "The prevalence threshold metric and its application to obstetrics and gynecology screening tests" Jacques Balayla keynote	60 "interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signalis", Jodo Ribeiro Pinto 62 "X-Al-Covid-19 Diagnosis System based Multi-Datasets", Aicha Boutorh 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 2D brain age biomarkers", Francesco Bardozzo 58 "RNA Secondary Structure Factorization in Prime Tangles", Daniele Marchei "Interdisciplinary research and scientific journals: how to get the best out of both" Stefano Tonzani keynote	15:00 15:20 15:40 16:00	
15:20 15:40 16:00 16:20	27 "Structural Classification of RNA Molecules using ASPRA Distance", Michela Quadrini 38 "Improving bacterial sRNA identification by combining genomic context and sequence-derived features", Moustafa Elsisy 44 "Improved prediction of H3K27ac histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference ime-point", Mohammar Hailai 56 "Feature Relevance in IncRNA Microarray Data", Emanuel Di Nardo "A new concordant partial AUC and partial c statistic for imbalanced data in the evaluation of machine learning algorithms" Andre Carrington keynote main track: 24 "RF-Isolation: a Novel Representation of Structural Connectivity Networks for	45 "In silico clinical trials for Relapsing-Remitting Multiple Scierosis with MS TreatSim', Flanne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data", Andrea Tanghertoni 49 "Combining Denoising and Flux Balanca Analysis for Single-cell Cluster Analysis", Bruno Giovanni Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Steep", Matteo Italia "The prevalence threshold metric and its application to obstetrics and gynecology screening tests" Jacques Balayla keynote modeling session & main track 46 "A multi-objective optimisation approach for the linear modelling of cerebral	60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals", João Ribeiro Pinto 62 "X-Al-Covid-19 Diagnosis System based Will-Datasets", Aicha Boutorth 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 2D brain age biomarkers.", Francesco Bardozzo 58 "RNA Secondary Structure Factorization in Prime Tangles", Daniele Marchei "Interdisciplinary research and scientific journals: how to get the best out of both" Stefano Tonzani keynote main track: 11 "Chemical Language Transformer for Drug-Target Binding Affinity", Vincenzo	15:00 15:20 15:40 16:00 16:20	
15:20 15:40 16:00 16:20	27 "Structural Classification of RNA Molecules using ASPRA Distance", Michela Quadrini 38 "Improving bacterial sRNA identification by combining genomic context and sequence-derived features". Moustafa Elsisy 44 "Improved prediction of HSZ7ac histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point. Mohammad Hallall 56 "Feature Relevance in IncRNA Microarray Data", Emanuel Di Nardo "A new concordant partial AUC and partial c statistic for imbalanced data in the evaluation of machine learning algorithms" Andre Carrington keynote main track: 24 "RF-Isolation: a Novel Representation of Structural Connectivity Networks for Multiple Scierosis Classification", Antoneila Mensi 35 "Boolean Network Inference a Different Levels of Logical Complexity", Eline van	45 "In sillico clinical trials for Relapsing-Remitting Multiple Scierosis with MS TreatSim', Fianne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data", Andrea Tangherloni 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster Analysis", Bruno Giovanni Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Sleep", Matteo Italia "The prevalence threshold metric and its application to obstetrics and gynecology screening tests" Jacques Balayla keynote modeling session & main track 46 "A multi-objective optimisation approach for the linear modelling of cerebral autoregulation system", Felipe-Andrés Bello Robiles 52 "QG-SPACE" Optimized Stochastic Simulation of Spatial Models of Cancer	60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals", Jobo Ribelro Pinto 62 "X-Al-Covid-19 Diagnosis System based With: Datasets", Aicha Boutorh 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 2D brain age biomarkers.", Francesco Bardozzo 58 "RNA Secondary Structure Factorization in Prime Tangles", Daniele Marchei "Interdisciplinary research and scientific journals: how to get the best out of both" Stefano Tonzani keynote main track: 11 "Chemical Language Transformer for Drug-Target Binding Affinity", Vincenzo Marco De Luca 30 "A Non-Negative Matrix Ti-Factorization based Method for Predicting Antitumor	15:00 15:20 15:40 16:00 16:20	
15:20 15:40 16:00 16:20 17:00	27 "Structural Classification of RNA Molecules using ASPRA Distance", Michela Quadrini 38 "Improving bacterial sRNA identification by combining genomic context and sequence-derived features". Moustafa Elsisy 44 "Improved prediction of HSZ72a histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point. Mohammad Hallall 56 "Feature Relevance in incRNA Microarray Data", Emanuel Di Nardo "A new concordant partial AUC and partial c statistic for imbalanced data in the evaluation of manchine learning algorithms' Andre Carrington keynote main track. 24 "RF-Isolation: a Novel Representation of Structural Connectivity Networks for Multiple Sclerosis Classification", Antonella Mensi 35 "Boolean Network Inference at Different Levels of Logical Complexity", Eline van Mantgem 50 "BRANET: Graph-based Integration of Multiple mois Data with Biological a priori for	45 "In silico clinical trials for Relapsing-Remitting Multiple Scierosis with MS TreatSim", Fianne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data", Andrea Tangherfornl 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster Analysis", Bruno Giovanni Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Sleep", Matteo Italia "The prevalence threshold metric and its application to obstetrics and gynecology screening tests" Jacques Balayla keynote modeling session & main track 46 "A multi-objective optimisation approach for the linear modelling of cerebral autoreguidation system", Felipe-Anréls Bello Robles	60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals", Jobo Ribeiro Pinto 62 "X-Ai-Covid-19 Diagnosis System based Multi-Datasets", Aicha Boutorh 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 20 brain age biomarkers.", Francesco Bardozzo 58 "RNA Secondary Structure Factorization in Prime Tangles", Daniele Marchel "Interdisciplinary research and scientific journals: how to get the best out of both" Stefano Tonzani keynote main track: 11 "Chemical Language Transformer for Drug-Target Binding Affinity", Vincenzo Marco De Luca 30 "A Non-Negative Matrix Tif-Factorization based Method for Predicting Antitumor Drug Sensitivity", Pietro Pinoli 41 "Synthetic cell biotechnology as a useful platform for chemical Ai", Pasquale	15:00 15:20 15:40 16:00 16:20	
15:20 15:40 16:00 16:20 17:00 17:20	27 "Structural Classification of RNA Molecules using ASPRA Distance", Michela Quadrini 38 "Improving bacterial sRNA identification by combining genomic context and sequence-derived features". Moustafa Elisisy 44 "Improved prediction of HSI/Zara bistone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point. Mohammad Hallali 56 "Feature Relevance in IncRNA Microarray Data", Emanuel DI Nardo "A new concordant partial AUC and partial c statistic for imbalanced data in the evaluation of machine learning algorithms" Andre Carrington keynote main track: 24 "RF-Isolation: a Novel Representation of Structural Connectivity Networks for Multiple Sclerosis Classification", Antonella Mensi 35 "Boolean Network Inference at Different Levels of Logical Complexity", Eline van Mantigen 50 "BRANET: Graph-based Integration of Multi-omics Data with Biological a priori for Regulatory Network Inference", Surabhi Jaglap 36 "Text mining enhancements for image recognitions of gene names and gene	45 "In silico clinical trials for Relapaing-Remitting Multiple Scierosis with MS TreatSim", Flanne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data", Andrea Tangherforni 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster Analysis", Bruno Glovanni Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Sleep", Matteo Italia "The prevalence threshold metric and its application to obstetrics and gynecology screening tests" Jacques Balayla keynote modeling session & main track 46 "A multi-objective optimisation approach for the linear modelling of cerebral autoregulation system", Felipe-Andrés Bello Robles 52 "OG-SPACE: Optimized Stochastic Simulation of Spatial Models of Cancer Evolution", Fabrizio Angaroni	60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals", Jodo Ribeiro Pinto 62 "X-Al-Covid-19 Diagnosis System based Multi-Datasets", Aicha Boutorh 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 2D brain age biomarkers", Francesco Bardozzo 58 "RNA Secondary Structure Factorization in Prime Tangles", Daniele Marchei "Interdisciplinary research and scientific journals: how to get the best out of both" Stefano Tonzani keynote main track: 11 "Chemical Language Transformer for Drug-Target Binding Affinity", Vincenzo Marco De Luca 30 "A Non-Negative Matrix Tri-Factorization based Method for Predicting Antitumor Drug Sensitivity", Petro Pinoli	15:00 15:20 15:40 16:00 16:20	
15:20 15:40 16:00 16:20 17:00 17:20	27 "Structural Classification of RNA Molecules using ASPRA Distance", Michela Quadrin! 38 "Improving bacterial sRNA identification by combining genomic context and sequence-derived features", Moustafa Elissy sequence-derived features", Moustafa Elissy sequence-derived features", Moustafa Elissy sequence-derived features, "Moustafa Elissy sequence features extracted from a reference time-point, Mohammad Hallall 56 "Feature Relevance in IncRNA Microarray Data", Emanuel Di Nardo "A new concordant partial AUC and partial c statistic for imbalanced data in the evaluation of machine learning algorithms" Andre Carrington keynote main track: 24 "RF-Isolation: a Novel Representation of Structural Connectivity Networks for Multiple Scierosis Classification", Antonella Mensi 35 "Boolean Network Inference at Different Levels of Logical Complexity", Eline van Mantgen 50 "BRANET: Graph-based Integration of Multi-omics Data with Biological a priori for Regulatory Network Inference," Surabhi Jagtap	45 "In silico clinical trials for Relapaing-Remitting Multiple Scierosis with MS TreatSim", Flanne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data", Andrea Tangherforni 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster Analysis", Bruno Glovanni Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Sleep", Matteo Italia "The prevalence threshold metric and its application to obstetrics and gynecology screening tests" Jacques Balayla keynote modeling session & main track 46 "A multi-objective optimisation approach for the linear modelling of cerebral autoregulation system", Felipe-Andrés Bello Robles 52 "OG-SPACE: Optimized Stochastic Simulation of Spatial Models of Cancer Evolution", Fabrizio Angaroni	60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals", Jobo Ribeiro Pinto 62 "X-Ai-Covid-19 Diagnosis System based Multi-Datasets", Aicha Boutorh 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 2D brain age biomarkers.", Francesco Bardozzo 58 "RNA Secondary Structure Factorization in Prime Tangles", Daniele Marchel "Interdisciplinary research and scientific journals: how to get the best out of both" Stefano Tonzani keynote main track: 11 "Chemical Language Transformer for Drug-Target Binding Affinity", Vincenzo Marco De Luca 30 "A Non-Negative Matrix Tri-Factorization based Method for Predicting Antiltumor Drug Sensitivity", Pietro Pinoli 41 "Synthetic cell biotechnology as a useful platform for chemical Al", Pasquale Stano 68 "What architectures could lead next generation single cell analysis pipelines?",	15:00 15:20 15:40 16:00 16:20 17:00 17:20 17:40
