time	Monday 15 November 2021	Tuesday 16 November 2021	Wednesday 17 November 2021		
9	All times are in CET (Italian) timezone	CIBB Scientific Programme (v8)			
09:00	CIBB 2021 Welcome	Second day welcome	Third day welcome	09:00	CIBB 2021 the 17th International Conference on
09:10				09:10	Computational intelligence Methods for Bioinformatics and Biostatistics
55.15	"Predicting medical complications in intensive care: early recognition of sepsis using machine learning" Karsten Borgwardt keynote	"Successful writing of bioinformatics grant proposals" Olaf Wolkenhauer keynote	"DOME: recommendations for supervised machine learning validation in biology" Dmytro Fishman keynote	00.10	15-17 November, 2021 online
	main track:	neurodegenerative diseases session:	DOME session, main track:		
09:50	1 "A collaborative training approach for stress detection", Eleonora Ciceri	64 "Percolation-based Stability Analysis of Functional Connectivity in Mild Cognitive Impairment and Alzheimer's Disease", Angela Lombardi	20 "Deep Recurrent Neural Networks for Generating Synthetic Coronavirus Spike Protein Sequences", Lisa Crossman	09:50	http://www.isa.cnr.it/cibb2021/
10:10	14 "Topology-Aware Optimisation of Vaccination Strategy for Minimising Virus Spreading", Pietro Hiram Guzzi	12 "Peeking inside the box: transfer learning vs 3D convolutional neural networks applied in neurodegenerative diseases", Amira Soliman	61 "The need of standardised metadata to encode causal relationships: Towards safer data-driven machine learning biological solutions", Beatriz Garcia Santa Cruz	10:10	
10:30	53 "Integrating Decision Tree Learning on the Graph Database Neo4j to Analyze Clinical Data", Robert Heyer	54 "Impaired core networks and time-distant reconfiguration patterns in Alzheimer's disease", Kai Du	33 "Toward a standard formal semantic representation of the model card report", Muhammad Amith	10:30	Each number represents the article EasyChair #ID
10:50	57 "Camera-assisted Motor State Assessment of Patients with Parkinson's Disease", Vassilis Plagianakos	65 "Computer aided diagnosis system for Alzheimer's disease using principal component analysis and machine learning based approaches", Lilia Lazli	39 "Predictive modeling for Inflammatory Bowel Disease detection from endoscopic imaging", Marco Chierici	10:50	
11:10	47 "Table detection in text documents for extracting regulatory interaction from literature of regulation in bacteria", Axel Zagal-Norman	9 "Deep transfer learning for DTI- and MRI- based early diagnosis of cognitive decline and dementia", Nitsa Herzog	48 "An alternative learning algorithm for tree augmented naive Bayes: an application to facial biotype classification", Gonzalo A. Ruz	11:10	keynote & invited speakers
11:30	3 "Interpretability methods for differential gene analysis of scRNA-seqclustering models", Ciortan Madalina	Non-linear Clustering of Smell Clinic Data Reliably Differs Parkinson's Disease Patients and Healthy People", Tatiana Anuchina	67 "Deep Learning based Deblocking of Fourier Ptycographic images", Mattia Delli Priscoli	11:30	pause
11:50	5 "High-dimensional multi-trait GWAS by reverse prediction of genotypes using machine learning methods", Muhammad Ammar Malik	26 "Stratification of Parkinson's disease patients from the Fox Insight study", Anita Valmarska	32 "Towards Generating Synthetic Pathways for Object Detection", Joshua Thompson	11:50	chairs
12:10	7 "Identifying SNP associations and predicting disease risk from Genome-wide association studies using LassoNet", Hussain Sajwani	43 "Identifying prototype model patients in Amyotrophic Lateral Sclerosis patients at diagnosis through Archetypal Analysis", Isotta Trescato	22 "Automatic Plankton Detection and Classification on Raw Hologram with a Single Deep Learning Architecture", Romane Scherrer	12:10	
12:30		51 "Inspecting Progression Trajectories in Amyotrophic Lateral Sclerosis using Process Mining", Erica Tavazzi	28 "Using Machine Learning to Predict Reading Strategies from fNIRS Data", Matthew Campbell	12:30	
	"Cellular and gene signatures of tumor-infiltrating dendritic cells and natural-killer cells predict prognosis of neuroblastoma" Ombretta Melaiu keynote	15 "End-to-end facial landmark detection to characterise oro-facial impairments in neurological patients: towards innovative techniques for the assessment of dysarthria", Lucia Migliorelli	8 "Convolution and Fast Fourier Transform to Compare Symbol Sequences", Michael Sadovsky		
13:10				13:10	main track
	pause	pause	pause		"Towards standardizing machine learning in life sciences: the FAIR principles and the DOME recommendations" session
	main track:	neurogenerative session & modeling session	ML session & main track:		"Artificial intelligence and statistical methods for neurodegenerative diseases" session
14:00	18 "Cancer-IncRNA: A Database of IncRNAs exploring chromosomal linkages in human cancers", Gaurav Kumar Bhagat	37 "Specialized prognostic models based on disease progression patterns: predicting non-invasive ventilation in ALS patients stratified by progression rate", Andreia Martins	21 "A Machine Learning-Based Efficient Sepsis Detection Using Electronic Health Records", Kai-Cheng Hsu	14:00	"Modeling and simulation methods for computational biology and systems medicine" session
14:20	19 "Summarizing Global SARS-CoV-2 Geographical Spread by Phylogenetic	25 "A statistical analysis of multiple sclerosis risk factor interaction with Bayesian	40 "Linear regression modelling to assess the impact of socio-economic,		"Machine learning in healthcare informatics and medical biology" session
	Multitype Branching Models", Hao Chi Kiang	networks", Morghan Hartmann	demographic and health-related variables on wellbeing in the elderly population",	14:20	
	Multitype Branching Models*, Hao Chi Kiang 23 "Batch Effect Detection in RNA-Seg Data using Machine-Learning-Based	networks", Morghan Hartmann 16 "Knowledge Graph-based Neurodegenerative Diseases and Diet Relationship	demographic and health-related variables on wellbeing in the elderly population", Isotta Trescato 42 "A statistical network method to identify relevant genes for pathway enrichment	14:20	
14:40 15:00	Multitype Branching Models*, Hao Chi Kiang	networks", Morghan Hartmann	demographic and health-related variables on wellbeing in the elderly population", Isotta Trescato	14:20 14:40 15:00	
14:40	Multitype Branching Models*, Hao Chi Klang 23 *Batch Effect Detection in RNA-Seq Data using Machine-Learning-Based Automated Assessment of Quality*, Maximilian Sprang 27 *Structural Classification of RNA Molecules using ASPRA Distance*, Michela	networks*, Morghan Hartmann 16 "Knowledge Graph-based Neurodegenerative Diseases and Diet Relationship Discovery," Yi Nian 45 "In silico clinical trials for Relapsing-Remitting Multiple Sclerosis with MS	demographic and health-related variables on wellbeing in the elderly population*, isotta Trescalo. 42 "A statistical network method to identify relevant genes for pathway enrichment analysis*. Gluseppe Agapito 60 "Interlead Conversion of Single-Lead Billindy-Segmented Electrocardiogram	14:40	
14:40 15:00	Multitype Branching Models*, Hao Chi Kiang 23 "Batch Effect Detection in RNA-Seq Data using Machine-Learning-Based Automated Assessment of Quality*, Maximilian Sprang 27 "Structural Classification of RNA Molecules using ASPRA Distance*, Michela Quadrini 38 "Improving bacterial sRNA identification by combining genomic context and	networks*, Morghan Hartmann 16 "Knowledge Graph-based Neurodegenerative Diseases and Diet Relationship Discovery*, Yi Nian 45 "In silico clinical trials for Relapsing-Remitting Multiple Scierosis with MS TreatSim*, Flanne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA	demographic and health-related variables on wellbeing in the elderly population", isotta Trescalo. 42 "A statistical network method to identify relevant genes for pathway enrichment analysis", Gluseppe Agapito 60 "Interlead Conversion of Single-Lead Blindy-Segmented Electrocardiogram Signais", Jobo Riberro Pinto	14:40 15:00	
14:40 15:00 15:20	Multitype Branching Models*, Hao Chi Klang 23 "Batch Effect Detection in RNA-Seq Data using Machine-Learning-Based Automated Assessment of Quality*, Maximilian Sprang 27 "Structural Classification of RNA Molecules using ASPRA Distance*, Michela Quadrini 38 "Improving bacterial sRNA identification by combining genomic context and sequence-derived features*; Moustala Elsies 44 "Improved prediction of H3K27ac histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted	networks*, Morghan Hartmann 16 "Knowledge Graph-based Neurodegenerative Diseases and Diet Relationship Discovery*, Yi Nian 45 "In sillico clinical trials for Relapsing-Remitting Multiple Scierosis with MS TreatSim*, Fianne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data*, Andrea Tangherfoni 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster	demographic and health-related variables on wellbeing in the elderly population*, isotta Trescato. 42 "A statistical network method to identify relevant genes for pathway enrichment analysis*, Gluseppe Agaptic 60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals*, João Ribeiro Pinto 62 "X-Al-Covid-19 Diagnosis System based Will-Datasets*, Aicha Boutorh 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks	14:40 15:00 15:20	
14:40 15:00 15:20 15:40	Multitype Branching Models*, Hao Chi Kiang 23 *Batch Effect Detection in RNA-Seq Data using Machine-Learning-Based Automated Assessment of Quality*, Maximilian Syrang 27 *Structural Classification of RNA Molecules using ASPRA Distance*, Michela Quadrini 38 *Improving bacterial sRNA identification by combining genomic context and sequence-derived features*, Moustafa Elsisy 44 *Improved prediction of HSZ7ac histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point. Mohammad Hallali	networks*, Morghan Hartmann 16 "Knowledge Graph-based Neurodegenerative Diseases and Diet Relationship Discovery*, Yi Nain 45 "In sillico clinical trials for Relapaing-Remitting Multiple Scierosis with MS TreatSim*, Flanne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data*, Andrea Tangherfornl 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster Analysis*, Bruno Glovanni Galuzzi	demographic and health-related variables on wellbeing in the elderly population*, isotta Trescato. 42 "A statistical network method to identify relevant genes for pathway enrichment analysis*, Glüseppe Agaptic 60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals*, Jobo Ribeiro Pinto 62 "X-Ai-Covid-19 Diagnosis System based Wilti-Datasets*, Aicha Boutorh 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 2D brain age biomarkers.", Francesco Bardozzo	14:40 15:00 15:20 15:40	
14:40 15:00 15:20 15:40 16:00 16:20	Multitype Branching Models*, Hao Chi Kiang 23 *Batch Effect Detection in RNA-Seq Data using Machine-Learning-Based Automated Assessment of Quality*, Maximilian Syrang 27 *Structural Classification of RNA Molecules using ASPRA Distance*, Michela Quadrini 38 *Improving bacterial sRNA identification by combining genomic context and sequence-derived features*, Moustafa Elsisy 44 *Improved prediction of HSZ7ac histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point. Mohammad Hallali	networks", Morghan Hartmann 16 "Knowledge Graph-based Neurodegenerative Diseases and Diet Relationship Discovery", Yi Nian 45 "In silico clinical trials for Relapsing-Remitting Multiple Scierosis with MS TreatSim", Flanne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data", Andrea Tanghertoni 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster Analysis", Bruno Glovanni Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Sleep", Matteo Italia "The prevalence threshold metric and its application to obstetrics and	demographic and health-related variables on wellbeing in the elderly population*, isotta Trescato. 42 "A statistical network method to identify relevant genes for pathway enrichment analysis*, Glüseppe Agaptic 60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals*, Jobo Ribeiro Pinto 62 "X-Ai-Covid-19 Diagnosis System based Wilti-Datasets*, Aicha Boutorh 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 2D brain age biomarkers.", Francesco Bardozzo	14:40 15:00 15:20 15:40 16:00	
14:40 15:00 15:20 15:40 16:00 16:20	Multitype Branching Models*, Hao Chi Kiang 23 *Batch Effect Detection in RNA-Seq Data using Machine-Learning-Based Automated Assessment of Quality*, Maximilian Sprang 27 *Structural Classification of RNA Molecules using ASPRA Distance*, Michela Quadrini 38 *Improving bacterial sRNA identification by combining genomic context and sequence-derived features*, Moustafa Elsisy 44 *Improved prediction of H3K/27ac histone marks in lime-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point*, Mohammad Hallal 56 *Feature Relevance in IncRNA Microarray Data*, Emanuel DI Nardo *A new concordant partial AUC and partial c statistic for imbalanced data in	networks", Morghan Hartmann 16 "Knowledge Graph-based Neurodegenerative Diseases and Diet Relationship Discovery", Yi Nain 45 "In sillico clinical trials for Relagaing-Remitting Multiple Scierosis with MS TreatSim", Flanne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data", Andrea Tangherforni 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster Analysis", Bruno Giovanni Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Sleep", Matteo Italia	demographic and health-related variables on wellbeing in the elderly population*, isotat Trescato. 42 "A statistical network method to identify relevant genes for pathway enrichment analysis*, Gluseppe Agapito 60 "Interlead Conversion of Single-Lead Blindy-Segmented Electrocardiogram Signals*, Joba Ribeiro Pinto 62 "X-Al-Covid-19 Diagnosis System based Multi-Datasets*, Aicha Boutorh 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 2D brain age biomatkers.*, Francesco Bardozzo 58 "RNA Secondary Structure Factorization in Prime Tangles*, Daniele Marchel "Interdisciplinary research and scientific journals: how to get the best out of	14:40 15:00 15:20 15:40 16:00	
14:40 15:00 15:20 15:40 16:00 16:20	Multitype Branching Models*, Hao Chi Kiang 23 *Batch Effect Detection in RNA-Seq Data using Machine-Learning-Based Automated Assessment of Quality*, Maximillan Syrang 27 *Structural Classification of RNA Molecules using ASPRA Distance*, Michela Quadrini 38 *Improving bacterial sRNA Identification by combining genomic context and sequence-derived features*, Moustafa Elsisy 44 *Improved prediction of H3K27ac histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point, Mohammad Hallati 56 *Feature Relevance in IncRNA Microarray Data*, Emanuel DI Nardo *A new concordant partial AUC and partial c statistic for imbalanced data in the evaluation of machine learning algorithms* Andre Carrington keynote	networks*, Morghan Hartmann 16 "Knowledge Graph-based Neurodegenerative Diseases and Diet Relationship Discovery*, 19 Nain 45 "In silico clinical trials for Relapsing-Remitting Multiple Sclerosis with MS TreatSim*, Fianne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data*, Andrea Tanghertoni 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster Analysis*, Bruno Giovanni Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Sleep*, Matteo Italia "The prevalence threshold metric and its application to obstetrics and gynecology screening tests" Jacques Balayla keynote modelling session & main track 46 "A multi-objective optimisation approach for the linear modelling of cerebral	demographic and health-related variables on wellbeing in the elderly population*, isotata Trescato. 42 "A statistical network method to identify relevant genes for pathway enrichment analysis", Gluseppe Agaptio. 60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals*, Jado Riberlo Pinto. 62 "X-Ai-Covid-19 Diagnosis System based Multi-Datasets*, Aicha Boutorh. 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 20 brain age biomarkers.", Francesco Bardozzo. 58 "RNA Secondary Structure Factorization in Prime Tangles", Daniele Marchei. "Interdisciplinary research and scientific journals: how to get the best out of both' Stefano Tonzani keynote.	14:40 15:00 15:20 15:40 16:00	
14:40 15:00 15:20 15:40 16:00 16:20	Multitype Branching Models*, Hao Chi kiang 23 *Batch Effect Detection in RNA-Seq Data using Machine-Learning-Based Automated Assessment of Quality*, Maximillan Syrang 27 *Structural Classification of RNA Molecules using ASPRA Distance*, Michela Quadrini 38 *Improving bacterial sRNA identification by combining genomic context and sequence-derived features*, Moustafa Elsisy 44 *Improved prediction of H3K27ac histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point.*, Mohammad Hallal 56 *Feature Relevance in IncRNA Microarray Data*, Emanuel DI Nardo *A new concordant partial AUC and partial c statistic for imbalanced data in the evaluation of machine learning algorithms* Andre Carrington keynote main track: 24 *RF-Isolation: a Novel Representation of Structural Connectivity Networks for	networks, Morghan Hartmann 16 "Knowledge Graph-based Neurodegenerative Diseases and Diet Relationship Discovery," Yi Nain 45 "In sillico clinical trials for Relapaing-Remitting Multiple Scierosis with MS TreatSim", Flanne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data", Andrea Tangherforni 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster Analysis", Bruno Giovanni Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Sleep", Matteo Italia "The prevalence threshold metric and its application to obstetrics and gynecology screening tests" Jacques Balayla keynote modeling session & main track	demographic and health-related variables on wellbeing in the elderly population*, isotat Trescato. 42 "A statistical network method to identify relevant genes for pathway enrichment analysis", Glussepe Agaptio. 60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals*, João Riberio Printo. 62 "X-Al-Covid-19 Diagnosis System based Multi-Datasets*, Alcha Boutorh. 66 "Soft brain ageing indicators based on light-weight Levk-Like neural networks and localized 2D brain age biomarkers.", Francesco Bardozzo. 58 "RNA Secondary Structure Factorization in Prime Tangles", Daniele Marchei. "Interdisciplinary research and scientific journals: how to get the best out of both" Stefano Tonzani keynote. main track: 11 "Chemical Language Transformer for Drug-Target Binding Affinity", Alessio.	14:40 15:00 15:20 15:40 16:00 16:20	
14:40 15:00 15:20 15:40 16:00 16:20	Multitype Branching Models*, Hao Chi kiang 23 *Batch Effect Detection in RNA-Seq Data using Machine-Learning-Based Automated Assessment of Quality*, Maximilian Syrang 27 *Structural Classification of RNA Molecules using ASPRA Distance*, Michela Quadrini 38 *Improving bacterial sRNA identification by combining genomic context and sequence-derived features*, Moustafa Elsisy 44 *Improved prediction of HIXC7ac histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point.*, Mohammad Hallal 56 *Feature Relevance in IncRNA Microarray Data*, Emanuel DI Nardo *A new concordant partial AUC and partial c statistic for imbalanced data in the evaluation of machine learning algorithms* Andre Carrington keynote main track: 24 *RF-Isolation: a Novel Representation of Structural Connectivity Networks for Multiple Sclerosis Classification*, Antonella Mensi 35 *Boolean Network Inference at Different Levels of Logical Complexity*, Eline van 35 *Boolean Network Inference at Different Levels of Logical Complexity*, Eline van	networks*, Morghan Hartmann 16 "Knowledge Graph-based Neurodegenerative Diseases and Diet Relationship Discovery*, Yi Nian 45 "In silico clinical trials for Relapsing-Remitting Multiple Scierosis with MS TreatSim*, Fianne Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data*, Andrea Tangherioni 49 "Combining Denoising and Flux Balance Analysis for Single-cell Cluster Analysis*, Bruno Giovanni Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Sleep*, Matteo Italia "The prevalence threshold metric and its application to obstetrics and gynecology screening tests" Jacques Balayla keynote modeling session & main track 46 "A multi-objective optimisation approach for the linear modelling of cerebral autoregulation system", Felipe-Andrés Bello Robiles 52 "QS-SPACE" Optimized Stochastic Simulation of Spatial Models of Cancer	demographic and health-related variables on wellbeing in the elderly population*, isotat Trescato. 42 "A statistical network method to identify relevant genes for pathway enrichment analysis", Glussepe Agaptio. 60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals*, João Riberio Printo. 62 "X-Al-Covid-19 Diagnosis System based Multi-Datasets*, Alcha Boutorh. 66 "Soft brain ageing indicators based on light-weight Levk-tike neural networks and localized 2D brain age biomarkers.", Francesco Bardozzo. 58 "RNA Secondary Structure Factorization in Prime Tangles*, Daniele Marchei. "Interdisciplinary research and scientific journals: how to get the best out of both" Stefano Tonzani keynote. main track: 11 "Chemical Language Transformer for Drug-Target Binding Affinity", Alessio Ferone. 30 "A Non-Negative Matrx. Tit-Factorization based Method for Predicting Antitumor.	14:40 15:00 15:20 15:40 16:20 17:00	
14:40 15:00 15:20 15:40 16:00 16:20	Multippe Branching Models*, Hao Chi Kiang 23 "Batch Effect Detection in RNA-Seq Data using Machine-Learning-Based Automated Assessment of Quality*, Maximilian Sprang 27 "Structural Classification of RNA Molecules using ASPRA Distance*, Michela Quadrini 38 "Improving bacterial sRNA identification by combining genomic context and sequence-derived features*, Moustafa Elsisy 44 "Improved prediction of HSZA" as histone marks in time-series experiments at one time-point using deep learning and novel DNA sequence features extracted from a reference time-point. Mohammad Hallal 56 "Feature Relevance in IncRNA Microarray Data", Emanuel Di Nardo "A new concordant partial AUC and partial c statistic for imbalanced data in the evaluation of machine learning algorithms" Andre Carrington keynote main track: 24 "RF-Isolation: a Novel Representation of Structural Connectivity Networks for Multiple Scierosis Classification", Antonella Mensi 35 "Boodean Network Inference at Different Levels of Logical Complexity", Eline van Mantgem 50 "BRANET: Graph-based Integration of Multi-omics Data with Biological a priori for	networks*, Morghan Hartmann 16 "Knowledge Graph-based Neurodegenerative Diseases and Diet Relationship Discovery*, 19 Nain 45 "In silico clinical triats for Relapsing-Remitting Multiple Sclerosis with MS Treatism*, Finano Sips 10 "Genetic Algorithms for the identification of marker panels in single-cell RNA Data*, Anterea Tanghertoni 49 "Combining Denoising and Flux Balanca Analysis for Single-cell Cluster Analysis*, Bruno Glovanin Galuzzi 31 "The First In-silico Model of Leg Movement Activity During Sleep*, Matteo Italia "The prevalence threshold metric and its application to obstetrics and gynecology screening tests" Jacques Balayla keynote modelling session & main track 46 "A multi-objective optimisation approach for the linear modelling of cerebral autoregulation system", Felipe-Andrés Bello Robbies 52 "OG-SPACE: Optimized Stochastic Simulation of Spatial Models of Cancer Evolution*, Fabrizio Angaroni	demographic and health-related variables on wellbeing in the elderly population*, isotat Trescato. 42 "A statistical network method to identify relevant genes for pathway enrichment analysis*, Glüseppe Agaptio. 60 "Interlead Conversion of Single-Lead Blindly-Segmented Electrocardiogram Signals*, João Ribeiro Pirito. 62 "X-Al-Covid-19 Diagnosis System based With-Datasets*, Alcha Boutorh. 66 "Soft brain ageing indicators based on light-weight LeNet-like neural networks and localized 2D brain age blomarkers.", Francesco Bardozzo. 58 "RNA Secondary Structure Factorization in Prime Tangles*, Daniele Marchei. "Interdisciplinary research and scientific journals: how to get the best out of both' Stefano Tonzani keynote. main track: 11 "Chemical Language Transformer for Drug-Target Binding Affinity", Alessio Ferone. 30 "A Non-Negative Matrix Tri-Factorization based Method for Predicting Antihumor Drug Sensitivity", Pietro Pinoli. 41 "Synthetic cell biotechnology as a useful platform for chemical Al", Pasquale	14:40 15:00 15:20 15:40 16:00 16:20
